LETTER OF RECOMMENDATION

Mr. Sai Aravind Reddy Thippanuri Reg No 11712468 was a final-year student of mine, and I am sending this letter in support of him. During this period, I have taught him the subject “Swift programming language”. His performance in this subject was good. Being his mentor, I discovered that he was a highly responsible learner. He has strong independence, desire, and concentration.

He has always responded well to the subjects in class and is an excellent speaker as well. He has the intellectual capacity to meet his objectives and is a highly motivated man. Aravind's ability to tackle his subject with a practical and analytical mindset is his most distinguishing quality. He'll excel in a research environment if he keeps up his current level of zeal and excitement, I'm sure of it.

Aravind has a strong record in his extracurricular activities and has won numerous medals while playing for our university's American football team in tournaments at the national level. With the aid of all these qualities, in my opinion, he has developed into a well-rounded individual. There is no question in my mind about his overall performance, which makes him a deserving candidate for a master's program at your esteemed institution. I heartily urge the graduate program to accept him for this reason.

Md. Ataullah

Assistant Professor

Department of Computer Science and Engineering
