## PERSONAL PROJECTS

Automated Deployment of Web Application in CI/CD Pipeline.

- The project's goal was to use CI/CD pipeline to deploy a web application to a cloud platform while ensuring that the application is deployed reliably and consistently with each new build, as well as fast and efficiently with the least amount of manual involvement.

Policy Administration System (11/2021 - 12/2021)

- RESTful APIs were built for an application using ASP.NET Core WebApi, and unit tests were run on the APIs using tools like Postman. Web APIs were also deployed into CI/CD pipelines on Microsoft Azure.
- Using CSS, Bootstrap, and Angular, user interface requirements were implemented.
- Hosted the database in the cloud using Microsoft SQL Server as the database (Microsoft Azure).

Online Art Gallery (05/2021 - 06/2021)

- This project is developed using ASP .NET MVC
- This is a web Application which allows user to view and buy any product and view arts.
